## DETAILED ACTION

### *Priority*

1. The examiner obtained a copy of applicants foreign priority document JP 2004-030288 and placed a copy of this document in the file.

### *Terminal Disclaimer*

2. The terminal disclaimer filed on September 17, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No's. 11/184,992 and 11/392,487 has been reviewed and is accepted. The terminal disclaimer has been recorded.

## REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: This application teaches a dye represented by the formula (2), (3) or (4):

formula (2)

wherein  $R_3$  and  $R_4$  each independently represents a monovalent group;  $Ar_1$  and  $Ar_2$  each independently represents an aryl group or a hetero ring group and M represents H or a cation;

formula (3)

wherein  $R_5$ ,  $R_6$ ,  $R_7$  and  $R_8$  each independently represents a monovalent group;  $Ar_3$  represents a divalent linking group and M represents H or a cation;

formula (4)

wherein  $R_9$  and  $R_{10}$  each independently represents a monovalent group;  $Ar_4$  and  $Ar_5$  each independently represents an aryl group or a hetero ring group;  $Ar_6$  represents a divalent linking group and  $M$  represents  $H$  or a cation and an ink composition containing the above dyes of the formula (2), (3) or (4). The closest prior art of record is US Patent No's. 6,878,196 and 6,923,855, both issued to Harada et al. Both references teach an ink jet ink composition comprising similar diazo dyes containing triazine rings but fail to specifically exemplify that the triazine ring has a hydroxyl group as a substituent in the specific position as claimed by applicants (i.e. applicant's  $-OM$  group). Applicants have provided evidence in the specification that the diazo dyes of the above formulas (2), (3) and (4) having an  $-OM$  group in the specific position of the instant claims provides improved ink stability as compared to similar diazo dyes that do not contain an  $-OM$  group in the specific position. Accordingly, applicants showing of unobviousness and unexpected results have overcome the provisional obviousness-type double patenting

rejections and the 103(a) rejections over both of the Harada et al. references and the application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
